Category Drug Class	Other Considerations
All Drugs	On a quarterly basis, new and existing products - including limited source generics, products with significant cost inflation, and specialty and non-specialty products - may be re-evaluated to determine appropriate formulary placement. These evaluations will assess whether clinically appropriate and cost-effective options remain available on the formulary and may result in removal, addition or deletion of a product.
Autoimmune and Hepatitis C *	For some clients, an Indication-Based Formulary will be utilized for products in these classes and may result in additional removals for certain conditions only.
Drugs for Infusion Into Spaces Other Than the Blood	A drug that must be infused into a space other than the blood will generally not be covered under the prescription drug benefit.
New-to-Market Agents ⁹	New-to-market products and new variations of products already in the marketplace will not be added to the formulary immediately. Each product will be evaluated for clinical appropriateness and cost-effectiveness. Recommended additions to the formulary will be presented to the CVS Caremark® National Pharmacy and Therapeutics Committee (or other appropriate reviewing body) for review and approval.

The listed formulary options are subject to change.

* This list indicates the common uses for which the drug is prescribed. Some drugs are prescribed for more than one condition.

† Listing does not include certain NDCs^A.

^A Drug products are identified by unique numerical product identifiers, called National Drug Codes (NDC), which identify the manufacturer, strength, dosage form, formulation and package size.

1 For use in patients previously treated with an HCV regimen containing an NS5A inhibitor (for genotypes 1-6) or sofosbuvir without an NS5A inhibitor (for genotypes 1a or 3).

2 If approved for coverage and prescribed for primary prevention of cardiovascular disease, may be covered without cost sharing through an exceptions process.

3 Rebranded or private label formulations are not covered (i.e., RELION).

4 Long Acting Insulins - First Generation.

5 BD ULTRAFINE syringes and needles are the only preferred options.

6 An ACCU-CHEK or ONETOUCH blood glucose meter may be provided at no charge by the manufacturer to those individuals currently using a meter other than ACCU-CHEK or ONETOUCH. For more information on how to obtain a blood glucose meter, call: 1-877-418-4746.

7 ACCU-CHEK or ONETOUCH brand test strips are the only preferred options.

8 Generic prenatal vitamins and CITRANATAL are the only preferred options.

9 An exception process may exist for specific clinical or regulatory circumstances that require coverage of a non-covered medication.
