Division of Water Pollution Control ANNUAL FACILITY INSPECTION REPORT

for NPDES Permit for Storm Water Discharges from Separate Storm Sewer Systems (MS4)

This fillable form may be completed online, a copy saved locally, printed and signed before it is submitted to the Compliance Assurance Section at the above address. Complete each section of this report.

Report Period: From March, 2022 To March, 2023

Permit No. ILR40 0485

MS4 OPERATOR INFORMATION: (As it appears on the current permit)

Name: Cook County Dept. of Transportation and Highways Mailing Address 1: 69 W. Washington Street, Suite 2400

Mailing Address 2: County: Cook

City: Chicago State: IL Zip: 60602 Telephone: 312-603-1601

Contact Person: Adam James, P.E., CFM Email Address: adam.james@cookcountyil.gov
(Person responsible for Annual Report)

Name(s) of governmental entity(ies) in which MS4 is located: (As it appears on the current permit)

Cook County

THE FOLLOWING ITEMS MUST BE ADDRESSED.

A. Changes to best management practices (check appropriate BMP change(s) and attach information regarding change(s) to BMP and measurable goals.)

- | | | | |
|--|--------------------------|---|--------------------------|
| 1. Public Education and Outreach | <input type="checkbox"/> | 4. Construction Site Runoff Control | <input type="checkbox"/> |
| 2. Public Participation/Involvement | <input type="checkbox"/> | 5. Post-Construction Runoff Control | <input type="checkbox"/> |
| 3. Illicit Discharge Detection & Elimination | <input type="checkbox"/> | 6. Pollution Prevention/Good Housekeeping | <input type="checkbox"/> |

B. Attach the status of compliance with permit conditions, an assessment of the appropriateness of your identified best management practices and progress towards achieving the statutory goal of reducing the discharge of pollutants to the MEP, and your identified measurable goals for each of the minimum control measures.

C. Attach results of information collected and analyzed, including monitoring data, if any during the reporting period.

D. Attach a summary of the storm water activities you plan to undertake during the next reporting cycle (including an implementation schedule.)

E. Attach notice that you are relying on another government entity to satisfy some of your permit obligations (if applicable).

F. Attach a list of construction projects that your entity has paid for during the reporting period.

Any person who knowingly makes a false, fictitious, or fraudulent material statement, orally or in writing, to the Illinois EPA commits a Class 4 felony. A second or subsequent offense after conviction is a Class 3 felony. (415 ILCS 5/44(h))

BMPs and Progress Towards Goals During Reporting Period

March 2022 – March 2023

PUBLIC EDUCATION AND OUTREACH

BMP: Continue to use website to post updated MS4 permit documentation and links to other agency's resources

GOAL: Maintain links on Cook County Department of Transportation and Highways (CCDOTH)

STATUS: website

Metropolitan Water Reclamation District (MWRD) is the Stormwater Management Agency for Cook County. Stormwater management program information is available to the public at MWRD's website www.mwrd.org and includes links for information about the rain barrel program. These links have been posted to the CCDOTH website. We have updated and will continue to review our website to keep links up to date in next reporting cycle.

The Cook County Forest Preserve District website provides event information regarding seminars, volunteer opportunities, and family activities related to preservation and stewardship of natural areas in Cook County. These links have been posted to the CCDOTH website. We will continue to review our website and keep links up to date in next reporting cycle.

CCDOTH will continue to update the website as necessary.

MS4 permit documentation has been added to CCDOTH website. We will continue to review our website and keep posted with the current Stormwater Management Plan for our department and copies of all recent Annual Reports along with a copy of our most current Notice of Intent (NOI)

PUBLIC PARTICIPATION AND INVOLVEMENT

BMP: Volunteering in Stormwater-Related Activities

GOAL: Continued participation in Watershed Planning and Stormwater Management meetings and workshops

STATUS: Continued attendance and participation by CCDOTH staff for Cook County Watershed Planning Councils organized by MWRD and local municipal mayors conferences. Meetings are held quarterly. We have updated links to watershed meeting schedule and location information to our website. We will continue to keep website up to date with latest information.

CCDOTH participates on the MWRDGC Technical Advisory Committee (TAC) for the Cook County Watershed Management Ordinance (WMO) administered by MWRD. TAC meetings are held as needed for discussion of revisions to the WMO

ordinance.

CCDOH continues to participate in a watershed work group for the North Branch of the Chicago River (which is in both Lake and Cook Counties). The purpose of the workgroup is to update the North Branch watershed plan, implement a water quality monitoring program in the North Branch and its major tributaries, and conduct outreach efforts to educate watershed residents and businesses on ways to reduce their contribution to polluted runoff into the waterway. CCDOH contributes membership dues which fund water monitoring, the crucial evidence needed for baseline metrics and setting improvement goals for certain pollutants that are impairing the waterway including nutrients, phosphates, and chlorides. CCDOH will continue its participation within the next reporting cycle.

CCDOH has also been active and will continue its participation in the Chicago Area Waterways Chloride Workgroup. The workgroup's primary efforts are to work together to address chlorides in our local waterways and improve the water quality by reducing chloride discharges.

Finally, CCDOH has been active and will continue its participation in the Illinois Road and Transportation Builders Association's, Landscaping and Erosion Control Subcommittee. This group is comprised of contractors, regulatory agencies, transportation agencies, and consulting engineers and is a forum to discuss best practices and emerging trends and requirements related to soil erosion and sediment control on construction sites.

ILLCIT DISCHARGE DETECTION AND ELIMINATION

BMP: Develop an IDDE program

GOAL: To have annual inspections documented for stream crossings in each district

STATUS: CCDOH has incorporated current culvert location / inspection data into our department's GIS-based system maps. We have also begun to create GIS data for storm sewers from our archives of scanned drainage plans. We anticipate the incorporation of this system information into our GIS maps to be completed within the next reporting cycle. This ongoing effort enables better management of the County's highway drainage system.

Also, work orders for storm sewer televising are issued as needed for planned roadway improvement projects. This work enhances our inspection efforts of our stormwater infrastructure and helps identify potential illicit discharges as well.

CONSTRUCTION SITE RUNOFF CONTROL

BMP: Project Oversight

GOAL: Continued use of IDOT Standard Specifications for Road and Bridge Construction and IEPA IL Urban Manual for erosion and sediment control

STATUS: Construction plan review by Resident Engineers (RE) and Contractors. Resident Engineer will continue to review erosion and sediment control plans for structure locations and proper installation methods with Contractor for every project requiring erosion control measures on-site before construction begins. All Contractors and Subcontractors will continue to be required to sign a Contractor Certification Statement to certify that they understand and shall comply with NPDES Permit ILR10 requirements for projects with NPDES permit.

POST-CONSTRUCTION RUNOFF CONTROL

GOAL: Continued use of the following BMPs within scope of related projects where appropriate. We will continue using long term O & M procedures and post-construction project documentation to comply with IEPA NPDES requirements.

BMP: Infiltration

STATUS: Design, construct and maintain grassed swales along rural county roads. Use of salt tolerant sodding and seed mixtures in landscaping of parkways.

BMP: Retention / Detention

STATUS: Continued to design and construct stormwater storage and implement retention practices in accordance with Cook County DOTD policy and MWRD Watershed Management Ordinance.

BMP: Use of storm sewer system oil-grit separators

STATUS: Continue to utilize Stormwater Pollution Prevention Systems to pre-treat storm water discharges where feasible within select CCDOTH road projects.

POLLUTION PREVENTION / GOOD HOUSEKEEPING

GOAL: Continued employee training and practice of good housekeeping and pollution prevention within road and district facility maintenance activities. Supporting documentation is kept on file with CCDOTH Maintenance Districts.

BMP: Maintenance District facility Stormwater Management Plans

STATUS: After further evaluation of staff resources, we will be seeking consultant services to assist CCDOTH Maintenance Bureau to update the Stormwater Management Plan for CCDOTH Maintenance District facilities (Districts I, II, IV and V) during the next reporting cycle.

BMP: Landscape maintenance activities – Litter Control
STATUS: Litter removal from roadway and parkways on monthly basis

BMP: Street Sweeping
STATUS: Street sweeping of country roads twice a year.

BMP: Storm drain system cleaning
STATUS: Storm Sewer and catch basin clean out performed on as needed basis throughout the year.

BMP: Hazardous Material Handling-Disposal Continued use of IDOT Standard Twice
STATUS: Monthly typical pick up by a disposal company

BMP: Spill response and prevention plan
STATUS: Thoroughly clean up spills with oil dry absorbent mixture when they occur.
Underground fuel tanks equipped with alarms to prevent spills from overfilling.

ATTACHMENT C

Information Collected During Reporting Period

March 2022 – March 2023

PUBLIC EDUCATION AND OUTREACH

RESULT: None.

PUBLIC PARTICIPATION / INVOLVEMENT

RESULT: None.

ILLICIT DISCHARGE DETECTION AND ELIMINATION

BMP: Development of IDDE Program

RESULT: Restrictive drainage criteria were used during the highway permit process for work done within Cook County Highway right-of-way prohibiting non-storm water and non-permitted storm water discharges to Cook County storm sewers and drainage ditches. Illicit discharge enforcement is done through CCDOTH's Permit Division with assistance by County State's Attorney office. Illicit discharge records continue to be kept by CCDOTH Permits Division and are available upon request.

CONSTRUCTION SITE RUNOFF CONTROL

BMP: Project Oversight; Construction Site Planning and Management; Erosion, Sediment, and Runoff Control BMPs; and Materials Management

RESULT: Construction Plan Review - Resident Engineers reviewed proposed SESC structure locations and proper installation methods with the Contractor for each project requiring erosion control measures on-site before construction began. All Contractors and Subcontractors were required to sign a Contractor Certification Statement to certify that they understood and would comply with NPDES Permit ILR10 requirements.

Construction Site Inspections and Maintenance - All REs completed inspection reports of erosion and sediment control structures every week and after every ½" rainstorm event as part of each project and gave a copy of each report with any instructions to repair or install all necessary ESC structures to the Contractor and/or Subcontractor. This information was kept on-site during construction in the SESC file maintained by each RE.

SESC BMPs - IDOT Standard Specifications for Road and Bridge Construction and IEPA IL Urban Manual were used for erosion and sediment control design, installation, and maintenance procedures for all construction projects during reporting cycle (see Attachment F).

POST-CONSTRUCTION RUNOFF CONTROL

BMPs: None

POLLUTION PREVENTION/GOOD HOUSEKEEPING

BMPs: Proper Disposal of Hazardous Waste, Landscape Maintenance Activities, Street Sweeping, Storm Drain Cleaning, and Spill Response and Prevention

RESULTS:

- The recycling of motor oil and disposal of used solvents and hazardous waste.
- Collection and removal of litter from roadways and parkways.
- Street sweeping all roadways at end of winter season by each district.
- Storm sewer and catch basin clean out is done on an as needed basis.
- Spill cleanup with oil dry absorbent materials and fuel tanks are equipped with overfill alarms and automatic shut off valves.

Various pollution prevention/good housekeeping activities (catch basin cleanings, culvert and storm sewer cleanings, street sweepings) are recorded and tracked through CCDOTH Road Maintenance software system.

ATTACHMENT D

Stormwater Activities to be Undertaken During Next Reporting Period

March 2023 – March 2024

PUBLIC EDUCATION AND OUTREACH

BMP: Public Education

GOAL: Website Updates: Continue to update links as necessary and provide current documentation for next reporting cycle.

PUBLIC PARTICIPATION / INVOLVEMENT

BMP: Soliciting Public Opinion

GOAL: Continued attendance at MWRD watershed planning council meetings and workgroups for Cook County.

ILLICIT DISCHARGE DETECTION AND ELIMINATION

BMP: Development of IDDE Program

GOAL: Continue to compile list of storm sewer system outfall locations and details for inclusion in the current Cook County GIS mapping system. We anticipate seeking consultant services to assist with this task during next reporting cycle.

CONSTRUCTION SITE RUNOFF CONTROL

The following CCDOTH projects are anticipated to be ongoing during the next reporting cycle:

151st Street Over Boca Rio Ditch

City of Oak Forest The project replaces the existing culverts carrying Boca Rio Ditch under 151st Street with a new precast concrete box culvert. Work will include channel stabilization, bioswale, and sediment basins of the Boca Rio Ditch, the precast concrete box culvert and poured in place headwalls, pedestrian hand railing, HMA pavement removal and full depth asphalt patching, asphalt shoulders, steel plate beam guardrail, storm sewer, pavement marking, signing, detour with traffic control protection and restoration. The project is ongoing.

County Line Road - Grand Avenue to North Avenue (North)

This project consists of reconstruction, realignment, and widening of County Line Road, construction to accommodate a new southbound exit ramp from I-294, drainage Improvements, installation of retaining walls, new traffic signals. The project is ongoing.

County Line Road - I-294 Ramp to North Avenue (South)

This project consists of roadway improvements including pavement reconstruction and bridge widening/replacement. The work to be performed under this contract consists of widening of an existing bridge substructure, furnishing, and erecting structural steel, building new approach slabs, retaining walls, earth excavation, construction of storm sewers and drainage structures, aggregate subgrade improvements, curb and gutter, PCC pavement, HMA base course widening, resurfacing with binder and surface courses, pavement markings, traffic signal replacement and installation roadway lighting. An IEPA NPDES permit will be issued for the project and NOI will be posted on website prior to start of construction. This project is ongoing.

Lake Cook Road – Arlington Heights to Raupp

The improvement consists of pavement rehabilitation of existing concrete roadway including pavement patching, HMA overlay, curb replacement, ADA curb ramp improvements, related traffic signal storm sewer, striping as well as all pertinent work to complete the improvement. The contract was let March 1, 2023, with construction starting in the near future.

Lake Cook Road – Raupp to Hastings

This project consists of PCC reconstruction/widening from 2 lanes in each direction to 3 lanes in each direction, addition of dual left turn lanes at Buffalo Grove Road, McHenry Road (IL Route 83), and Weiland Road, addition of right turn lanes at McHenry Road, installation of barrier medians, installation of noise abatement walls on both sides of Lake Cook Road, west of Lexington Drive, and installation of bike path on north side and sidewalk on south side. An IEPA NPDES permit was issued for the project and the NOI has been posted on the website. Project is currently nearing completion.

POST-CONSTRUCTION RUNOFF CONTROL

- BMP:** Infiltration, Retention/Detention
- GOAL:** The department will investigate opportunities to incorporate native plants where possible in landscaping. Native plants would increase the capacity for erosion, sediment, and runoff control.
-
- BMP:** Storm sewer system Oil-Grit Separators
- GOAL:** Identification of locations of all existing storm water pollution separation devices currently installed with CCDOTH system continues to be a goal for the upcoming cycle.

POLLUTION PREVENTION / GOOD HOUSEKEEPING

BMP: Maintenance District facility Stormwater Management Plans

GOAL: In the next reporting cycle, we will be seeking consultant services to assist CCDOTH Maintenance Bureau to update the stormwater Management Plan for CCDOTH Maintenance District facilities (Districts I, II, IV and V).

BMP: Road Salt BMPs

GOAL: Within the next reporting cycle, we anticipate beginning to develop a plan to implement BMPs to reduce chloride runoff from road salt. These new practices are a result of our participation in the CAWS Chloride Workgroup. Details on improvements will be reported in the Department's TLWQS for Chloride Annual Report.

BMP: Storm Drain System Cleaning

GOAL: Within the next reporting cycle, we anticipate entering drainage structure cleaning records into our GIS data layer to improve data gathering and tracking.

ATTACHMENT E

Use of Other Agencies to Satisfy Permit Obligations

March 2022 – March 2023

PUBLIC EDUCATION AND OUTREACH

BMP: Public Education

AGENCIES: Links to various agency websites are provided on CCDOTH's website relating to public education for stormwater management, participation in environmental programs, and event information. Agencies are as follows:

MWRD

Forest Preserves of Cook County

Cook County Sherriff's Office Drug Takeback Program

Salt Smart Collaborative

See Attachment B for details

PUBLIC PARTICIPATION / INVOLVEMENT

BMP: Public Involvement

AGENCIES: Metropolitan Water Reclamation District of Greater Chicago (MWRD):

- Local Watershed Planning Council Meetings (5 local councils)

- Technical Advisory Committee (TAC)

Illinois Association for Floodplain and Stormwater Management (IAFSM)

RESULT: CCDOTH staff attend public watershed council meetings and are members of the MWRD technical advisory committee for updates to the countywide stormwater management ordinance.

CCDOH staff also attend the annual IAFSM Conference and various seminars.
