

Program Name	Residential Real Time Pricing:	Peak Time Savings Rebate:	Central AC Cycling:
Overview	Rate prices fluctuate hour by hour. Pay lower rates at times when the demand for energy is low and manage your energy use with online tools and price alerts.	Earn a credit on your bill when you reduce or delay energy use on certain summer days.	Your air conditioner is remotely turned down to reduce energy use while keeping your home cool and comfortable on certain summer days.
Estimated Savings	Approx. 20% on your electric bill, based on changes you make.	Approx. \$12-\$60 over a summer based on changes you make.	\$20 or \$50 from June-September depending option selected.
Do I Need a Smart Meter to Participate?	Yes	Yes	No
Things to consider	<ul style="list-style-type: none"> ▪ Some people may not be comfortable with the fluctuation of prices by the hour, but generally the hourly prices are much lower than the flat rate. ▪ You must choose Residential Real Time Pricing or Municipal Aggregation set rates. 	<ul style="list-style-type: none"> ▪ There is no risk if you don't reduce or delay usage, but to save money you must actively take steps to reduce or delay energy use. ▪ You must choose Peak Time Rebates, Central AC Cycling, or net metering. 	<ul style="list-style-type: none"> ▪ The savings are almost effortless after you sign up, but you must choose Peak Time Rebates, Central AC Cycling, or net metering.
